

# DASH Partnership: Convenings

Your targets. Our infrastructure.  
Deployable tools that keep you ahead of the field.

## What is DASH?

DASH (Digital Agricultural Systems Hub) aims to empower agricultural stakeholders to solve their most pressing farming and ranching problems by rapidly creating and deploying AI-powered precision agricultural tools and technology. We provide a fully integrated system including the infrastructure, imaging systems, machine-learning operations and training pipelines to farmers, researchers and breeders.

## Why Convene?

Co-create a custom 3-year plan of stakeholder-defined phenotyping targets.

**Stronger Solutions**  
Tools are aligned with real-world needs.

**Better Outcomes**  
We focus on what matters most to your operation.

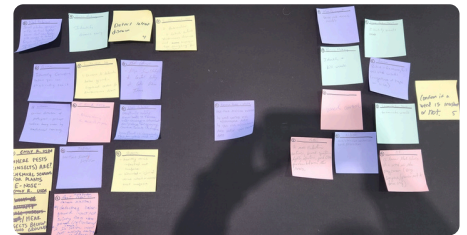

**Lasting Partnerships**  
Collaboration today drives impact for years to come.

## What is a Convening?

The best precision ag solutions start with the right conversations. DASH convenes commodity-focused stakeholder workshops to make sure our phenotyping technologies and AI tools are driven by local needs.

These sessions allow us to:

- **Define the challenges** most pressing to your commodity and region
- **Gather diverse expertise and perspectives** from across sectors
- **Build partnerships** to sustain long-term collaboration
- Understand your **priorities and timeline** so our tools fit your reality
- **Develop actionable next steps** that move from conversation to real-world impact

## DASH Target Life Cycle

**Convene**  
Bring the right people together

**Develop**  
Generate a 3-year strategic plan

**Construct**  
Develop protocols collaboratively

**Deploy**  
Collect training data; develop models

**Validate**  
Evaluate impact and refine for success
